First ever HANDS FREE substitute for crutches!

Who needs RollerFoot™

- Physically able people with foot/ankle injuries.
- Non-weight bearing on foot/ankle as a result of injury or surgery. 
- Anyone who hates crutches and
- Those who need hands free mobility.

Why you need RollerFoot™

- To move about without the use of hands
- To work and stay productive!
- To dramatically improve the quality of life during recovery/rehab period.
- To stimulate upper leg muscles in the injured leg and offset atrophy due to inactivity
- To look sharp and have fun

How RollerFoot™ works

Your injured leg in a cast (or in a rigid orthopedic boot) is firmly attached to the RollerFoot inside the leg channel that is anatomically contoured. Once secured, you can easily propel yourself with your good leg similar to skating or skiing.

RollerFoot™ features

- Extremely maneuverable
- Compact: the smallest possible overall size
- Light and extremely strong
- Easy to overcome small obstacles
- Height / weight adjustable
- Distinctive design
- Engineered with advanced technology and materials

RollerFoot™ is for active, dynamic people who need and want to keep going after a foot/ankle injury.
