

## About RollerFoot™

RollerFoot™ is developed and distributed by  
Step Dynamics, LLC.

**U.S. Patent 7,959,545 B2**

Milwaukee, Wisconsin, USA

RollerFoot is a compact hands-free knee scooter  
designed for people recovering from foot, ankle, or  
lower-leg injury or surgery who need to remain  
non-weight-bearing.

Its handlebar-free design helps users stay mobile  
while keeping both hands available for everyday  
activities at home, at work, and in other indoor  
spaces.

**Phone 414 704 7810**

## RollerFoot™

### Hands-Free. Rolling. Supported.

RollerFoot provides supported rolling  
mobility while keeping both hands  
available. Unlike traditional steerable  
knee scooters that require a handlebar,  
RollerFoot moves with the user without a  
steering column.

Its compact footprint is especially useful  
in kitchens, bathrooms, offices,  
workshops, laundry rooms, and other  
tighter indoor spaces.

**Stay Active.**

## Who RollerFoot is For

### RollerFoot may be a good fit for people who:

- are recovering from a foot or ankle injury or procedure
- have been instructed to remain non-weight-bearing
- want to keep both hands available
- need to stay active at home or at work
- want a compact mobility option for everyday indoor use

### DESIGNED FOR REAL LIFE

RollerFoot can help users stay involved in everyday activities such as preparing meals, moving around the home, working at a counter or desk, and navigating smaller spaces

## A DIFFERENT KIND OF KNEE SCOOTER

Traditional steerable knee scooters provide rolling mobility, but your hands remain on the handlebars.

Hands-free crutch-style devices free your hands, but rely on walking or stepping motion.

### RollerFoot combines supported rolling mobility with hands-free use.

Your recovering lower leg remains supported while you move through everyday spaces without a steering handlebar. With no steering column or handlebar in front of you, RollerFoot lets you move close to counters, desks, equipment and work surfaces — nothing between you and the task.

### WHAT USERS APPRECIATE

- Both hands remain available
- Unobstructed access to counters and work surfaces
- Supported rolling mobility
- Height-adjustable design
- Easy maneuverability

*"I absolutely love it."*

*"I don't know what I would have done without it."*

## WHAT USERS SAY

*"There is really nothing I can't do around the house on RollerFoot—laundry, fixing meals, and everyday tasks."*

*"I was originally suggested a knee scooter, but my RollerFoot is totally hands free, and that's what a busy wife and mom needs."*

*"I just wanted to share with you how pleased I am with this product."*
